

Grant County Landfill
750 E & State Road 18
Marion, IN

Site Background

This is a 55-acre facility, which served Marion and surrounding communities and was first issued a solid waste-operating permit in March 1979. The landfill accepted conventional solid waste, special waste, and for a short period, hazardous waste. The facility submitted a timely Part A application but in June, 1981 a letter was sent to the EPA indicating a RCRA permit was no longer necessary. It was closed in 1988.

Current Status

The monitoring wells and creek were sampled in April and June 2000. No constituents of concern were detected at levels above a health concern.

The Environmental Indicators (CA725 and CA750) have been determined to be under control and RCRA Corrective Action has terminated for the site.

Future Action

The Abandoned Landfill Group and State Cleanup will continue to monitor this site.
